Speech Writing

You are Ankit / Ankita. You have to deliver a speech on topic Education gives one power

Respected principal ma'am, worthy teachers and my dear friends. Good morning everyone. I Ankita standing here to deliver a speech on the topic Education gives power.

Education provides us knowledge. It trains our mind and sharpens our skills and abilities. Education defines our taste and temperaments and builds our thought process. Vocational Courses help young boys to earn and learn together. They provide means of learning and open the door to employment. Highly skilled professional seeks jobs in companies and business concerns. Decent living is impossible without good income or high salary. If women are educated, the whole family gives education. We can control the situation and shape our destiny. It spreads awareness among people and gives them freedom from social ill. It makes people independent and they become responsible citizens and realise their rights and duties. In short Education gives one power

Thank you!

Speech writing

You are Priya / Piyush. You are a member of the Environment Club of your school. After visiting many places you have realized that it is the need of the hour to protect environment. You decide to create awareness among the students. Write a speech in 150-200 words on 'Environment protection' to be delivered in the morning assembly.

Respected principal, teachers and friends! Global warming has accelerated the rise of temp on earth. The sea level is also rising & glaciers are melting away. Natural calamities are taking a toll of life on earth. Floods & scanty rainfall result in a crunch of food products, drinking water & disturb normal living conditions. The drought in Rajasthan has led to deaths & famine. Man is himself to blame for the deterioration of ecosystem. Depleting forests, industrial pollution, toxic wastes, vehicular pollution & lack of green cover are

some of the contributory factors. The entire process of environmental pollution is becoming a vicious cycle. School children have begun to create awareness by campaigning against polythene bags & recycling waste material. Let us join hands to protect our forests, grow more trees, check toxic pollutants and change our lifestyle.

Thank you
